

SIBIN B

SOFTWARE ENGINEERING | BACKEND DEVELOPER

+91 6381597822 | sibin230805@gmail.com | [Git](#) | [LinkedIn](#) | [Portfolio](#) | [Leetcode](#)

ABOUT ME

Software Engineering student with hands-on experience in Java, Spring Boot, REST APIs, SQL, MySQL, and backend application development. Built 3+ software projects, including scalable web applications and AI-powered systems, with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, debugging, and database design. Proficient with Git, AWS, and interested in building reliable backend systems and high-performance data infrastructure.

EDUCATION

B.TECH (AI & DS) — SRI KRISHNA COLLEGE OF ENGINEERING AND TECHNOLOGY
CGPA: 8.25

2023 – Present

TECHNICAL SKILLS

Languages: Java, Python, SQL

Tools: Git, GitHub, VS Code, Excel, Eclipse, Maven

Backend: Spring Boot, REST APIs

Core Skills: Data Structures & Algorithms, OOP, DBMS, Debugging, Problem Solving, Computer Networks

Soft Skills: Analytical Thinking, Communication, Adaptability

Databases: MySQL, H2 Database

PROJECTS

Real-Time Monocular Depth Estimation Using Edge AI

- Developed a real-time monocular depth estimation and object detection system using MiDaS, YOLO, and OpenCV for intelligent scene understanding.
- Optimized the inference pipeline using TensorRT and ONNX to reduce latency and improve deployment efficiency on edge devices.
- Built an RGB-based obstacle detection and distance estimation pipeline for real-time 3D perception, enabling faster and more accurate environmental analysis.

Backend Plant Care Scheduler using Spring Boot REST APIs

- Developed a backend-focused plant care scheduling application using Spring Boot, React, and MySQL for efficient plant management.
- Designed and implemented RESTful APIs for plant management, automated reminders, and scheduling using Spring Data JPA.
- Built CRUD operations with SQL database integration and optimized backend services for reliable scheduling and data management.

Bank Management System (Java)

- Developed a Java-based banking management system using Object-Oriented Programming with CRUD operations and efficient HashMap-based data management.
- Implemented secure account management with deposits, withdrawals, updates, and validation to ensure reliable transaction processing.
- Enhanced application reliability through exception handling, input validation, and optimized account lookup using efficient data structures.

CERTIFICATIONS

- AWS Cloud Quest: Cloud Practitioner – AWS Skill Builder
- Database and SQL – Infosys Springboard
- Spring Data JPA with Spring Boot – Infosys Springboard
- Java Foundation – Infosys Springboard
- Data Science with Python – Infosys Springboard

ACHIEVEMENTS

- Solved 250+ Data Structures and Algorithms problems on LeetCode with focus on Trees, Graphs, Dynamic Programming, BFS/DFS, Backtracking, and Hashing.
- Participant – Caterpillar Tech Challenge 2025.
- Built multiple backend applications using Java and Spring Boot.
